Education

Vellore Institute of Technology

Integrated M.Tech in CSE and Computational & Data Science

Expected 2030

DAV Public School, Bazpur

Class XII (CBSE) – 74% | Class X (CBSE) – 89%

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, Golang

Development & Tools: Git, React.js, Node.js

OS: Arch Linux (Hyprrland), Windows

Projects

Sorelax – Autonomous Context Agent | *Python, FastAPI, TypeScript, Gemini API*

- Built an autonomous AI agent that aggregates project context from GitHub, Slack, Linear, and Notion using Coral SQL for unified project intelligence.
- Developed a full-stack system with FastAPI APIs, a React dashboard, and a PyQt6 desktop GUI, enabling automated context generation and real-time project insights.

lyricT – CLI Lyrics Syncer | *Python, Linux APIs*

- Developed a terminal-based lyrics synchronization tool for Linux media players using MPRIS and `playerctl` integration.
- Implemented real-time lyric fetching with caching mechanisms to improve synchronization accuracy and reduce lookup latency.

AMD Slingshot – AI Voice Interviewer | *Python, Groq API (Llama 3.3)*

- Engineered a real-time voice pipeline and audio management system using Python and PyQt6 for adaptive audio-based mock interviews.
- Integrated LLM APIs for automated resume analysis and developed a custom classification script to evaluate behavioral responses.

Hackathons & Competitions

Pirates of the Coral-bean — WeMakeDevs Hackathon

Online

Sorelax - Autonomous background agent tracking workflow analytics

- Collaborated in a fast-paced hackathon environment to design and develop a functional project prototype under strict time constraints.
- Focused on rapid feature implementation, system design, and iterative problem-solving to deliver a working solution.

AMD Slingshot Hackathon

Online

AI Voice Interviewer – Project Presentation & Development

May 2026

- Designed and presented a cross-platform desktop AI mock interview application to a panel of industry experts.
- Engineered a low-latency real-time voice pipeline using PyQt6 integrated with the Groq API and Llama 3.3 for adaptive question generation.
- Developed custom behavioral analysis scripts and an automated PDF engine to generate comprehensive performance reports.
